

# ISO/DIS 1167-4, Thermoplastics pipes, fittings and assemblies for the conveyance of fluids - Determination of the resistance to internal pressure - Part 4: Preparation of assemblies

This part of international standard ISO 1167 specifies the procedure to be used for the preparation of both end load bearing assemblies and of non-end load bearing assemblies, for the determination of the resistance to internal hydrostatic pressure according to ISO 1167-1. This title may contain less than 24 pages of technical content.
