

Classic Science Fiction Shorts

Engaging, entertaining and most of all enlightening; these are the three characteristics that all great literary art is judged upon. Great works of fiction transcend the time of their creation and offer new perspective to each succeeding generation of readers. For the reader, great literary works inspire and delight, often posing difficult questions, thoughtful revelations, and profound emotions. The genre of science fiction deals with the imagined, but plausible. Largely based on writing rationally about alternative possible worlds or futures, it often explores the consequences of scientific innovations. As a means of understanding the world through speculation and storytelling, science fiction has antecedents back to mythology, but the genre of science fiction is product of the Age of Reason and the development of modern science itself. Pulp magazines were inexpensive fiction magazines published from 1890s through the 1950s. Pulp magazines were printed on cheap paper with ragged, untrimmed edges. The term pulp derives from the cheap wood pulp paper on which the magazines were printed. The magazines are best remembered for their lurid and exploitative stories and sensational cover art. In the early 20th century, pulp magazines helped develop a new generation of mainly American SF writers, influenced by Hugo Gernsback, the founder of *Amazing Stories* magazine. This book contains some of the best examples of the pulp era of Science Fiction. 524 pages. Classic Science Fiction Shorts contains the following stories: Introduction Old Cromptons Secret by Harl Vincent Spawn of the Stars by Charles Willard Diffin The Corpse on the Grating by Hugh B.
